

EV Driver App **User Guide**

GET IT ON
Google Play

Download on the
App Store

1

Download the AMP EV App

Find us on Google Play or on the App Store and sign up to register your new account.

2

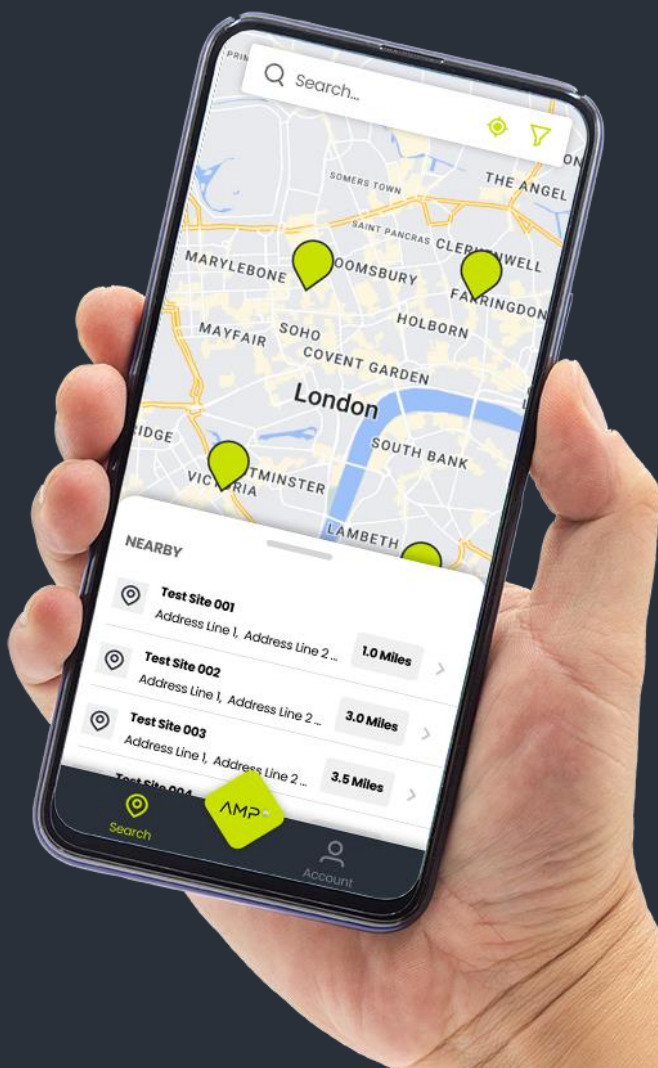

Find your charger

Scan QR code direct from the app, input charger ID code or browse nearby chargers. Select charger and click START.

3

Add payment

Enter your payment details to pay for your charging session. You will only need to do this once. Click SAVE CARD.

4

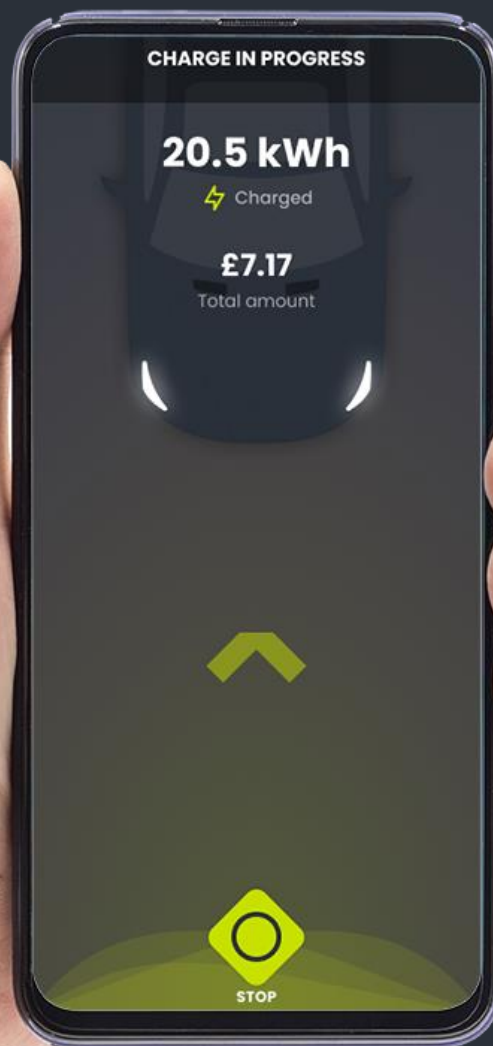

Connect vehicle

Plug cable into the car and charge point. Your session has now begun, and your car is charging.

5

End your session

To end your session and release your vehicle, hold down stop until prompted to unplug your cable.

Alternative ways to charge

1 Guest Charging | PAYG

You can still charge with AMP EV without registering on the app. Simply scan the QR code on your charger with your smartphone camera and pay directly on the website for that charger.

2 RFID Cards

If charging with an RFID card, simply tap the card against the charger and connect your vehicle. Your session will start immediately.

To end your session, tap your RFID card again and unplug your vehicle.
