

AMP EV – Carbon Reduction Plan

Published Date: August 2024

Revised: 01 October 2025

URL: <https://ampev.co.uk/carbonreductionpolicy>

Version: 2.0

Responsible Officer: Alasdair Croft – Project Director & HSEQ Manager

1. Supplier Information

Organisation Name: AMP EV Limited

Website: <https://ampev.co.uk>

Commitment: AMP EV Ltd is committed to achieving Net Zero greenhouse gas emissions by 2040.

2. Baseline Emissions Footprint

Baseline Year: December 2022 – November 2023

Calculation Methodology: Greenhouse Gas Protocol Corporate Standard (2015) using 2023 UK Government Conversion Factors. Assessment completed by Chamber Low Carbon (East Lancashire Chamber of Commerce).

Scope	Source	tCO ₂ e
Scope 2	Indirect GHG emissions (electricity)	1.34
Scope 3	Staff commuting (included category)	7.85
Total		8.86

3. Carbon Reduction Targets

We aim to reduce our total emissions by 50% by 2028 (from 8.86 tCO₂e to 4.41 tCO₂e).

Target Pathway:

2023 – 8.86 tCO₂e

2025 – 6.65 tCO₂e

2028 – 4.41 tCO₂e

2040 – Net Zero

4. Carbon Reduction Initiatives

Operational Efficiency

- Replacement of all lighting with energy-efficient LED fittings and use of PIR/daylight sensors.
- Installation of low-flow sanitaryware.
- Restoration of blocked rooflight in warehousing to reduce lighting demand.

Energy & Buildings

- Review and replacement of AC/heating systems with low-carbon alternatives.
- In partnership with the landlord, commission three quotes for Solar PV and battery storage systems.
- Introduce internal sub-metering to track and optimise energy consumption.

Transport & Logistics

- Prioritisation of round-trip logistics to reduce fuel usage.
- Exploration of alternatives to diesel vans for contractors.
- Develop a monitoring system to capture delivery and installation emissions.

Procurement & Waste

- Implement a company-wide Sustainable Procurement Policy, assessing supplier sustainability credentials.
- Explore renewable electricity tariffs and green supply options.
- Introduce waste/resource audit procedures and recycling enhancement programmes.

Governance & Engagement

- Appoint an internal Environmental Champion to lead ongoing Net Zero strategy.
- Conduct annual carbon footprints, including all GHG categories.
- Engage supply chain partners in reducing Scope 3 emissions.

5. Declaration and Compliance

This Carbon Reduction Plan complies with:

- PPN 06/21
- SECR (Streamlined Energy & Carbon Reporting)
- GHG Protocol Corporate Standard
- Carbon Reduction Plan Guidance (2021)

Emissions have been calculated using UK Government conversion factors for company reporting. Scope 1, 2, and selected Scope 3 emissions have been transparently reported.

Signed:

Alasdair Croft

Managing Director, AMP EV
